

Biowest Quality Serum :
Fetal Bovine Serum,
Ultra-Low Endotoxin
> *Best choice for your cells.*

Biowest Quality Products :
Best Solution for your Cell Culture Operations

- Lowest endotoxin level : < 0.1 EU/mL
- Triple 0.1 µm Filtered
- Virus & Mycoplasma Tested
- Ideal for sensitive Cells & Applications

For more than 25 years Biowest has been a reliable partner for Sera products. Our system of vertical integration allows us to be certain of the origins and traceability of our FBS.

Each manufactured batch is rigorously controlled, from the collection of serum and throughout all stages of its treatment and production, up to final packaging on our premises. All manufacturing steps are in accordance with the European regulations and follow the highest quality standards.

We are the preferred choice for all research, academic and industrial applications, which requires lowest endotoxin levels.
